### **HORSE CLIPPER RENTAL & SALE**

#### **FOR WOUND HEALING**

##### **TOPICAL PREPARATIONS:**

- Cothivet** solution/spray (Vetoquinol) all natural and herbal: 89.5% hydrocotyle tincture, also contains horse Chestnut tincture, rosemary oil, cypress oil, thyme oil, lavender oil, fenugreek tincture, carlina tincture. Had produced amazing results. Many testimonials, check our web site
- Well-Horse** (Equine Organics, California USA): 100% natural ingredients: blend of resins of trees from the Amazon Rain Forest. Anti-bacterial, promotes healing, anti-oxidant. Resins dry to form a film over the wound protecting wound from soiling and flies. Every horse or dog person should have one in the first aid kit. Very popular. Good for the first aid kit. Not a single negative report.
- Derma Gel** (Original Swiss Formula) (Maximillan Zenho & Co. USA): Isotonic hydrogel for intensive wound care. Provides barrier to moisturize and to protect against contamination. Bandaging not reqd. Favours hair re-growth after healing. Suitable especially for gouged wounds.
- Rescue Cream:** From the Bach Flower Remedies line. All natural.
- Schreiner Herbal Solution** (promotes healing and prevents proud flesh: contains aloe vera, golden seal, Comfrey, myrrh, cayenne, elder extracts)
- Calendula Complex Cream:** Homeopathic cream contains calendula, belladonna, apis mellifica, and phytolacca): for healing, anti-septic, itching, redness, swelling, inflammation.
- Double Heart Equine Salve:** herbal ointment for healing and wound protection.
- Calendula mother tincture:** to be diluted about 1 in 10 in sterile water for wound cleaning and dressing.

##### **INTERNAL REMEDIES TO PROMOTE WOUND HEALING:**

- Arnica Complex:** Homeopathic mixture that has arnica and calendula as well as other remedies for promotion of healing.
- Calendula 30 CH:** homeopathic remedy that promotes closure of wounds.
- Staphysagria 30 CH:** for cuts
- Ledum 30 CH:** homeopathic remedy that is specific for puncture wounds. Prevents tetanus.
- Bellis Perennis:** When internal organs are affected. Specific remedy for breast injuries.

#### **FOR FUNGAL AND BACTERIAL INFECTIONS**

##### **Chlorhexidine 4% Scrub**

- Hibitane** Ointment: contains chlorhexidine which is anti-bacterial and anti-fungal.
- Microban** gel, spray, shampoo (contains biodegradable anti-septic that had been used by NASA in decontaminating astronauts)
- Imaverol** solution/spray/shampoo: most effective anti-fungal topical agent for horses
- Proiodine** 10% solution (1% free iodine)
- Stronger Iodine** solution (7%): caution: may burn. Not for open wounds.
- Churchill's iodine:** (16%): only for hooves. Absolutely contra-indicated for skin wounds.
- Fungasol** Spray: for fungus infection
- HomeoPanaril-F:** Homeopathic mixture for closed abscess or before abscess is formed
- HomeoPanaril-O:** Homeopathic mixture for open abscess, to help drain the pus.
- HomeoSeptil**

HomeoMamil: Specifically for the udders  
Echinacea Plus

### **FOR TRAVEL/TRANSPORTATION**

**Atravet granules**

**Atravet injections**

**A-CE vet injections**

**A-CE Vet tablets**

**HomeoVia:** homeopathic mixture that helps motion sickness and sedation

**ABCD Complex** (similar to the old Dr. Bell's Wonder Drops): shipping fever, calming, colic

**HomeoCalm:** homeopathic mixture that does general calming

**Trypto-B:** 1 -2 teaspoonful 2 hours before journey.

Thiamine Hydrochloride powder: Pure pharmaceutical grade Vitamin B1 used for calming horses.

Thiamine Injection (custom order only because now getting expensive)

### **DAILY VITAMINS**

**Performance One** (Science Pure, all round daily vitamin, minerals, glucosamine, MSM, creatine, DMG, lysine, methionine, vit. C, biotin, etc.)

**Mega Blut**

Designed for the performance horse. Original maximum strength formula by Sterivet.

Mixture is in powder form packed in daily pouches. 30 pouches per box. Oral haematinic to help maintain performance levels in horses exposed to ultimate stress and an aid in the prevention and treatment of iron deficiency anaemia.

Supplies essential vitamins and minerals including vitamin E to help muscle development, and zinc to meet increased requirements during growth and stress, speeding up carbon dioxide removal from cells. Also contains electrolytes.

Mega Blut is the choice to replace the discontinued Visorbin because of the quality, time honoured efficacy, ease of administration and affordability.

**Nutrequin Classic** and **Nutrequin Elite** (veterinarian professional grade multi vitamin/minerals)

**CT Support** (Science Pure: CT stands for Connective Tissue: glucosamine, MSM, vitamins, mineral, DMG, etc.)

**Equine Super Diet** (by Vetoquinol, similar to the discontinued "Replenish": best value high grade daily all round vitamin/ mineral. Highly palatable, apple flavored pellets. For the performance horse, mares and foals. Contains zinc, copper and other minerals that may help prevent bone problems in young horses.)

Dr. Reed's #1 (powder) and

Dr. Reed's #2 (pellets): The #1 (powder) is for general use. The #2 (pellets) is formulated specifically for mares and foals to prevent DOD's (developmental orthopaedic disorders including contracted tendons, epiphysitis, etc.), but *the pellet is in fact safe for any kind and age of horse*. These vitamins are formulated by Dr. David Reed who had practiced in BC for decades and who is very familiar with the deficiencies in local feeds. So, these vitamins are good daily "insurance" supplements for horses on local feed. The famous equine nutritionist Shannon Oldham-Dueck as well as Unifeed's Dave Dybel were also instrumental in its formulation. There is an article by Karen Briggs outlining the benefit of this supplement in the March 2005 edition of the Pacific & Prairie Horse Journal. Dr. Reed's vitamin is made locally in the Fraser Valley and we do not have to order large quantities so the stock is always fresh. And finally, the price is right. For more information, phone Dr. David or Mrs. Wendy Reed at 250-546-6902. You can also email them at [thereeds@uniserve.com](mailto:thereeds@uniserve.com).

Ultra-Kelp (Dried Norwegian kelp good for general health, coat, hoof, vitality, used as a general daily

vitamin supplement.)

Kelp (Herbs for horses)

Wheat Germ Oil (for coat and joints)

Fish Oil (Omega fatty acids, the good fats, for coat and joints)

Dicalcium Phosphate (calcium supplement for bones and for typing up)

MegaSel liquid (E & selenium, good for typing up)

E & Selenium Powder/Crumbles

Mega E 10.000 powder (Vitamin E for tying up, for anti-oxidant action)

## **ELECTROLYTES**

**Endura (Metagenics):** Electrolyte designed for strenuous exercise, has magnesium for preventing cramps, has malic acid for preventing fatigue. Metagenics designs and makes professional naturopathic grade supplements. Orange flavored. Highly palatable.

E-Charge (electrolyte)

Apple-Eh (apple flavored electrolyte)

Quench Apple

Liquid Electrolyte from Vetoquinol (easy to use, just pour into water trough).

**Normal Saline** Injection

**Electrolytes Infusion** by Vetoquinol Amino Plus IV jug (Univet: amino acid, vitamins, electrolyte, and some dextrose)

**Aminolean IV jug** (Vetoquinol: similar to Amino Plus and higher quality)

Amino Acid Injection (now substituted by AminoLean) Injection

Aminodex (now substituted by AminoLean) Injection

**AminoLean** (Vetoquinol) Injection

Cal-Plus IV injection (Calcium borogluconate injection)

Dextrose IV injection

Sodium Iodide Injection

Unilyte Injection: now substituted by Electrolyte Infusion by Vetoquinol

Calcium borogluconate Injection

## **PROBIOTICS**

**Ration Plus:** The probiotic of choice according to Michael Plumb, elected Horse Product of the Year by The Horse Journal, does not contain live organisms so the horse does not have to deal with the immigration of foreign organisms. Instead of importing foreign organisms Ration Plus provides a favorable environment for intrinsic (existing) organisms to flourish and re-establish themselves. Effective for weight gain and for hard keepers because it enhances digestion, absorption and assimilation of the feed. Also for frequent colics and other digestive disorders, good adjunct to antibiotic and dewormers. Need to be mixed with feed. It cannot be put directly into mouth.

**Probio Plus (Herbs for Horses):** dried live organisms. Ideal when immediate replacement is required.

**Equine Choice:** Not just a probiotic. Contains vitamins and minerals. For daily use. Effective for fixing gastro-intestinal problems.

## **IMMUNE BOOSTERS**

**Thymuline 9CH Liquid:** Standard homeopathic treatment for immune problems including allergies.

Vit C powder

Vitamin C injection

## **Echinacea compositum ad us. vet injection**

**APF** : Liquid herbal concentrate: adaptogen: herabl extract of Eleutherococcus senticosus, Schizandra chinensis, Rhodiola rosea, Echinopanax elatus)

**Engystol Vet Injection** : homeotoxicological preparation for immunity

**Coenzyme compositum homeopathic liquid**

**Echinacea Plus Powder** (Basic Sports Nutrition) (herbal & vitamin preparation for immunity)

**Probiotics** (as listed under “Probiotics”)

### **For NAVICULAR/FOUNDER/LAMINITIS**

Navicular Relief (Herbs for Horses: herbal preparation to control pain in navicular disease)

**Custom designed homeopathic programs** (book consultation with us)

Navicular Quad

### **For Contracted Tendons or Epiphysitis**

Contracted Tendon Complex

### **For CUSHING’S**

Chase Tree Berries (balances hormones)

Custom designed homeopathic programs (Book consultation with us)

### **For ULCERS**

**Henry’s GI Mix** (homeopathic, geared for GI problems from stress, over-exertion & exhaustion)

**Ration Plus** (probiotic, serve as adjunct therapy, good for prevention)

Stoma-coat (Univet): antacid and sticky coating for stomach

Milk of Magnesia: antacid

Ulcer Therapy Plus (UTP) (by Herbs for horses) Liquid (Chamomile, marshmallow, slippery elm, licorice, meadowsweet, bioflavenoids) Has more remedies than U-7. Has gastric calmers, mucosal soothers, and healing agents in addition to deglycyrrhizinated licorice.

**Ulcerex** powder (Basic) (chamomile, marshmallow, slippery elm, licorice, meadowsweet, bearberry, comfrey root) Acidum nitricum Injeel for acute and persistent ulceration.

Nux Vomica complex

Cloverdale Nerve Complex: homeopathic mixture for GI problems due to nerves

**U-7** (Finish Line: deglycyrrhizinated licorice root extract, amino acids, minerals): herbal mixture that promotes healing by enhancing Globet cell activity and increasing mucus in the mucus membranes.

### **For COLIC**

**Dr. Bell’s Wonder Drops: ABCD Complex** (the old Dr. Bell’s Wonder Drops): [The original Dr. Bell's Wonder Drops had been discontinued in the 90’s by the manufacturer for no given reason. What we sell these days is a mixture we ask our laboratory to make for us, with a formula based on the original Dr. Bell's. You can look at our version as the "generic Dr. Bell's". We call it "ABCD Complex". Dr. Bell's Wonder Drops is an old folklore medicine, never scientifically proven, but seems to be effective for colic, shipping fever, agitation, and stress. Being homeopathic, it does not produce any side effect. People who look for it know exactly what it is and how to use it. Costs about \\$25 \(Cdn.\) for 30 ml. \(about 1/3 of the cost of the original\). Each dose is 3 - 5 ml. directly into the mouth. Contains homeopathic Aconite, Belladonna, Columbrina \(Nux vomica\), Digitalis in homeopathic \(not chemical or allopathic\) forms, hence does not call for a prescription. Note the first letter of each ingredient, hence we call it ABCD Complex.](#)

**Spasm Complex** (homeopathic mixture)

**Probiotics:** The use of a probiotic on a daily basis has been shown to be effective in preventing colic and other gastro-intestinal problems. **Please read under “Probiotics” for more detail and choices.**

**Ration Plus:** Known to be effective for long term management of repeated colic or tendency to colic.

The probiotic of choice according to Michael Plumb, elected Horse Product of the Year by The Horse Journal, does not contain live organisms so the horse does not have to deal with the immigration of foreign organisms. Effective for weight gain and for hard keepers because it enhances digestion, absorption and assimilation of the feed. Also for frequent colics and other digestive disorders, good adjunct to antibiotic and dewormers. Cost less than a dollar a day).

Equine Choice Probiotic

Probio-Plus

**Nux Vomica Complex**

**Psyllium Husk Powder:** Supplies raw fibre that helps in repetitive colic especially due to sand colic.

### **For WEIGHT GAIN (MUSCLES)**

*Please click Performance Enhancers and read under Body Builder*

**Body Builder:** this is the name of a product.

**Muscle II**

**Ration Plus** (Probiotic preparation voted as #1 by Michael Plumb’s Horse Nutritional Journal, does not have the live organisms so horse does not have to deal with import of immigrant bacteria, Best replacement for anabolic steroids)
