

Cloverdale Pharmasave

The staff at Cloverdale Pharmasave understands the value of Integrity, professionalism, knowledge and care. Their store has a warm and welcoming atmosphere – you will feel nothing less than comfortable talking with these kindhearted pharmacists. Each staff member offers his or her time and care in finding out what it is their clients need. They are known as the “Problem Solvers”: they are happy to help with any problem you may have! They regularly write informational articles for local Cloverdale newspapers, where you can read up on some useful medical information for you and your family.

Their team is made up of 9 expert staff members; all trained in a variety of specialties, their family business is fully equipped with a range of different skills. Dr. Henry Cheng, the owner of Cloverdale Pharmasave, introduced the wellness theme into Pharmasave stores across the entire country. To Cheng, wellness is a combination of Orthodox and Western medicine; he believes in the exploration of herbal and homeopathic remedies for a holistic approach on medicine.

Cloverdale Pharmasave carries vet grade professional dewormers, ear and eye remedies, flea products, joint medicines, etc. And if you know what is going on with your pet they might have the remedy.

What an exciting time it's been for this company. Their thirty years in business culminated in a big celebration in September, where hundreds of loyal Pharmasave fans shared the day. They raised \$2,760 for the BC Cancer Foundation through the Head Shave for Cancer, and close to \$500 for the BC SPCA. As it was also a customer appreciation day, attendees received 30% off almost the entire store, with part of the sales going to the two charities.

Henry Cheng is the winner of several awards including “Friend of Pharmacy (2000)”, the “Community Services Award” for the region of Surrey in (1999), and the Pharmacy Post DOSA Award (2003).
